

Migrate from WM to EWM with McCoy: a 3-phased approach

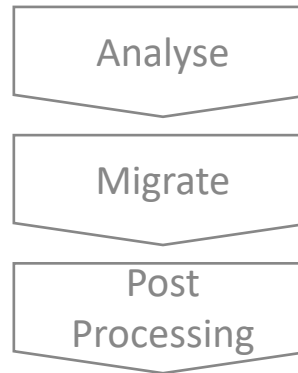

McCoy has developed a unique approach for migrating your warehouse from SAP WM to SAP EWM. Our approach will keep your existing processes intact. We focus on your situation. This results in a successful migration.

Value Added EWM functionalities

- Flexible setup for complex warehouse processes, reducing custom development
- EWM is in control, not your floor personnel, resulting in higher stock accuracies
- Short learning curve, short training period for floor personnel

Your Business Benefits

- Reducing costs
- Accelerate the migration project
- Smooth transition from WM to EWM
- Reducing project risks

McCoy offers: 3-phased migration approach

- 1) Analyse**
Assessments using template documents
- 2) Migrate**
Standard and McCoy specific, easy to use Fiori based tooling.
- 3) Post Processing**
Necessary developments, finalizing customizing

Our McCoy specific Fiori based migration tools can also be used during cut-over for migrating stock from the WM system into EWM.

Standardized Approach

3 well defined phases using templates and tools will reduce project risks.

Accelerate

Shorten the migration timeline by using our standard tools and templates, while keeping your existing functionalities.

Maximize value, reduce costs

A shorter timespan minimizes costs while all advantages of SAP EWM are at your disposal.
